WHY JOIN?

The WNFM is a member driven non-profit organization dedicated to encouraging open and constructive dialogue between nuclear fuel participants about current issues facing our market.

Membership is comprised primarily of organizations who actively participate in all aspects of the nuclear fuel cycle including fuel suppliers, fuel buyers, traders, brokers, investment firms, consultants, transporters, and government policymakers.

The WNFM organizes and hosts an intimate and informal annual meeting featuring timely information and discussion on current market trends, to help shape effective strategies for our members and to provide a forum for interaction for the industry at large. We pride ourselves on having our annual meeting being organized by the membership itself, through an elected board who are actively involved in the nuclear fuel market.

For the latest market trends solely focused on nuclear fuel, there is no better option.

WHO WE ARE

The World Nuclear Fuel Market (WNFM) was established in 1974 to promote international commerce in nuclear fuel materials. WNFM membership comprises about 80 companies representing around 21 countries, and the WNFM welcomes all nuclear fuel industry organizations and other interested parties to join.

WNFM BOARD OF GOVERNORS

The WNFM Board is composed of seven (7) persons - six members elected by WNFM member organizations and one Executive Director appointed by NAC International. The six elected Governors are employees of WNFM member organizations and are chosen based on their interest in, and knowledge of, the purpose and activities of the Board of Governors.
